About Us

Expectra Tyres is a family run business with its roots in Durban, KwaZulu-Natal, South Africa. Since its incorporation, Expectra Tyres has grown to be a trusted supplier in many sectors of the tyre industry both locally and internationally. These sectors include transport, agriculture and mining. In recent times, Expectra Tyres has focused significant resources to improving sustainability through innovative ways to reclaim, recycle and reuse end-of-life tyres. This research and development has led to a new product offering that reduces harmful waste while benefiting a variety of industries. These new products include Tyre Derived Fuel (TDF), Tyre Derived Aggregate (TDA) and Rubber Mulch. Expectra Tyres has grouped these products under a division of the company called IRABHA™ which is focused on continuously pushing the boundaries of sustainability to make the world a better place.

IRABHA™ Premium Rubber Mulch looks like real wood and is the perfect ground cover for landscaping and playground applications. IRABHA™ Premium Rubber Mulch is built to last up to a decade, saving time and money. Made from 100% recycled rubber, IRABHA™ Premium Rubber Mulch will help prevent weed growth, will not attract damaging insects such as termites and carpenter ants, and aids soil moisture retention.
