

Club Med South Africa Splash Park Installation

Location: KwaZulu-Natal, South Africa
Partners: IRABHA™ division of Expectra 259 (Pty) Ltd.
Products Used: Rosehill TPV® (custom blends)

Project Overview

Set within the lush coastal landscape of KwaZulu-Natal, the new Club Med resort brings together ocean, adventure, and wildlife in a uniquely immersive destination.

As part of this landmark development, a vibrant splash park was created to provide a safe, engaging, and visually striking play space for guests of all ages.

Working with our South African distributor IRABHA™, Rosehill TPV® surfacing was selected to deliver a high-performance solution capable of withstanding the demands of a water-based play environment, while complementing the resort's premium aesthetic.

The Challenge

Splash parks present a demanding set of requirements:

- Constant exposure to water and UV
- High footfall in a hospitality setting
- Strict safety and slip-resistance requirements
- A need for bold, long-lasting colour

In addition, the resort setting required a finish that felt premium, playful, and in keeping with the surrounding natural environment.

The Solution

Rosehill TPV® was chosen for its proven performance in wet-play environments.

Installed in a series of vibrant, interlocking colour zones, the surface provides:

- Excellent slip resistance under wet conditions
- Strong UV stability for long-term colour retention
- Durability under continuous use
- A smooth, comfortable finish underfoot

The flexibility of the Rosehill TPV® system allowed the design to incorporate bold shapes and colour contrasts, enhancing both visual appeal and user experience.
